Figure 1 is a line graph showing the temperature profile of the sample during the experiment. The y-axis represents Temperature (°C) from 0 to 300, and the x-axis represents Time (sec) from 0 to 220. The temperature starts at approximately 25°C at 20 seconds, rises linearly to about 115°C at 120 seconds (labeled 86 ~ 100 sec), then rises sharply to a peak of 255 ± 5 °C at 135 seconds (labeled 5 ± 0.5 sec), and finally decreases to about 105°C at 180 seconds.
