Figure 1 is a line graph showing the change in the number of individuals of the 1st and 2nd generations of the European spruce sawfly (*P. abietis*) over time from 1997 to 2002. The Y-axis represents the number of individuals (0 to 7000), and the X-axis represents time in days (0 to 1400). The 1st generation (solid line) peaks at approximately 7000 individuals around day 1000. The 2nd generation (dashed line) peaks at approximately 6000 individuals around day 1200.
